Summary

Graduated from the Department of Industrial Design at NYUST and am now focused on UI/UX design. My industrial design background helps me put myself in users' shoes and uncover what they really need, and I'm always expanding my skills to keep up with where design is heading. Although I'm just starting my career, I'm good at bringing together different perspectives on a team and building consensus, and I always put user experience at the center of my work. I'm looking forward to joining a team that values great user experience and building products that make people's lives easier.

Education

National Yunlin University of Science and Technology
